

LTM SERVICE FEES W.E.F. 01-01-2016

These services cover the full manufacturing processes, i.e. plotting, planning, color estimation / optimization, sawing, cutting and polishing, and final faceting for color optimization.

Customers receive reports for validation throughout the entire process and can constantly interact with the project leader.

Once the entire manufacturing process is completed, a detailed report tracing the entire manufacturing history is sent.

Customers then have the following options:

- To get back the polished stone(s) and coordinate the certification process by themselves
- To commission Lemon TechnoMist to look after the entire certification process

B.1. Diatomography-S: Colorless Diamonds

Rough size	Plotting, Planning, Color Estimation / Optimization, Cutting and Polishing
Below 49.99ct.	US\$ 190 / ct.
