Why LTM ?

Lemon TechnoMist is not a contract manufacturer but a technologies service company. With state of the art infrastructure, constant R&D and cutting edge technologies, LTM strives to add value to each stone. That's what we call 'Imagineering Diamonds'. Some of the cutting edge technologies used by LTM are -

For Data Collection – Different Lighting environment for Images like Judge II, Digital Imaging Box, under UV light and between polarized glasses to assess stress. Vi-Box for movie collection and Di-Box for still images, Munsell Bracketing, cutwise.com platform for online business.

For Rough Diamond Analysis – X-Ray scanner for cavity mapping, Immersion Glass Technology to estimate size and clarity without windowing / marking, M-Box 2.0 to plot inclusion with pixel resolution as low as 0.001mm. Pacor Client, Oxygen software with Smart Recut feature for Round as well as Fancy Shapes. Spectroscopy for D to Z color estimation as well as for Fancy Color diamonds to increase face up color saturation.

For Polishing – Plan "O" Mill, Avalon, Galahad, Helium Polish and Reflect Scanners, EOS Fancy Bruting Machine, Ceramic Polishing Mill to polish high stress diamonds. HRD Microscope with V8 Optics.
